# Al-Saudia Virtual Academy <br> Pakistan Online Tuition - Online Tutor Pakistan <br> M.A (PREVIOUS) EXTERNAL ANNUAL EXAMINATION 1999 <br> "ECONOMICS" (PAPER-III) 1999 <br> "ADVANCED ECONOMICS STATSTICS" 

Time allowed: Three Hours
Max Marks:100
INSTRUCTIONS: 1) Attempt any five questions.
2) All questions carry equal marks.
1.(a) A raw data is transformed into a frequency distribution. Mean and standard Deviation calculated separately for each data. What do you expect, whether the means and standard deviations would be identical? If not, under what condition they would be identical.
b) A test was given to 200 candidates for a few vacancies in a bank. Marks obtain in the test are presented in the following table:

| Marks | $1-6$ | $7-12$ | $13-18$ | $19-24$ | $25-30$ | $31-36$ | $37-42$ | $43-48$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No of <br> Candidate | 10 | 30 | 40 | 45 | 35 | 20 | 15 | 05 |
| Cumulative <br> frequency | 0 | 40 | 80 | 125 | 160 | 180 | 195 | 200 |

i) Determine the mean ( X ) and standard Deviation ( S ).
ii) If the top 10 percent of the candidates are to the considered for employment what it the lowest limit of marks. 36.5.
iii) Approximately what percent of candidates earned more than ( $\quad x+2 S$ ) marks
2. For the data given in Q-No. 1 (b) above, determine:
i) First there raw moments about 21.5 as origin.
ii) First three true moments.
iii) The above value of $\beta_{1}$ and comment about skewness of of the data drawing a rough sketch of the distribution.
3. Given below is a demand schedule, where $x$ is the price per unit in rupees and $y$ is the quantity of a good in thousand units.

| Price (X) | 10 | 12 | 15 | 17 | 20 | 21 | 25 | 30 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Quantity <br> (Y) | 50 | 45 | 42 | 40 | 39 | 37 | 35 | 34 |  |

i) Estimate the demand function and predict the demand when price Rs. 32 per unit.
ii) Estimate the overage revenue function and predict the average revenue when 55 thousand and units are demanded.
iii) Determine the correlation coefficient between $x$ and $y$.
4. Distinguish between:
i) Discrete and continuous variables
ii) Primary and Secondary data.
iii) Time series and cross section data.
iv) Measures of Location and Dispersion.
V) Sample survey and census.
5.a) A set of 10 observations found to have a mean 55 and variance 15 , Later, on checking it is discovered that two observations 45 and 55 were mistakenly recorded, while the correct observations were 40 and 60 . Determine the corrected mean and variance.
b) State and explain the characteristic features of mean and Standard Deviation.
6.a) State and explain the steps involve in the construction of index numbers.
b) The group indices and the corresponding weights obtained from a house hold income and expenditure. Survey is given as under. Construct the cost of living index:

| GROUP | INDEX |  | WEIGHT |
| :--- | :---: | :---: | :---: |
| FOOD | 115 | 0.20 |  |
| RENT | 110 | 0.25 |  |
| UTILITIES | 125 | 0.15 |  |
| EDUCATION | 130 | 0.20 |  |
| CLOTHING | 135 | 0.10 |  |

7. Given below is the population of a town in millions during the past five census. Interpolate the population of the town during 1991.

YEARS: 19511961197119811998
$\begin{array}{llllll}\text { POP : } & 2.35 & 2.47 & 2.59 & 2.72 & 3.00\end{array}$
8. A) Let $x$ be a normally distributed random variable having a mean 57 and a standard deviation 8. Determine the following probabilities:
(i) $\mathrm{P}(\mathrm{x}>50)$ (ii) $\mathrm{P}(\mathrm{x}>62)$ (iii) $\mathrm{P}(50<\mathrm{x}<67)$ (iv) $\mathrm{P}(62<\mathrm{x}<70)$ (v) $\mathrm{P}(\mathrm{x}=60)$
b) There digit numbers are formulated using the digits $0,1,2,3,4,5$ and 6 , no digit repeat in the same number. Find the probability of:
i) Even numbers. li) Odd numbers. lii) A number greater that 450 .
9. A) Write a short note on Time Series Analysis.
b) Fit a second degree trend and calculate the trend values for the following data:

YEARS: $19801981 \quad 1982 \quad 19831984 \quad 1985 \quad 1986$
SALES: $\begin{array}{llllllllll}25 & 28 & 33 & 38 & 45 & 53 & 64 & 77 & 95\end{array}$
(000)
